

Panasonic Mfg. Phils. Corp.

Case Study

PMPC is a manufacturer, importer and distributor of electronic, electrical, mechanical, electro-mechanical appliances, other types of machinery, parts and components, battery and other related products bearing the "Panasonic" brand.

Zumicon was selected to bid the Exterior Waterproofing & Painting of 3 [warehouse](#) buildings ranging in size from the smallest at 13,000 sq. ft. and the largest of 19,000 sq. ft. of Floor Square Footage. Zumicon was awarded the job by PMPC. Zumicon was chosen as the most qualified bidder from a total of 5 Painting Contractors bidding this project.

Zumicon went to work by power washing roof and utilize wire brushing, as needed, to bring to tight rust finish. Before proceeding, the roof was free of dirt, debris and completely dry. Prep the surface area including sealing fasteners and horizontal & vertical seams along with penetrations using Hypersal LM25. Once prep was completed, Sealbond Anti-Corrosive primer coat and Bondflex Acrylic Waterproofing paint as Topcoat were applied. Upon completion, the finished roof was thoroughly inspected by Zumicon and approved by Facilities and Engineering management of PMPC.
