

Dr. Yanga's Hospital

Situated at the heart of Bocaue, Bulacan. Dr. Yanga's Hospital is among the known tertiary hospital in the province.

Construction of new 8 storey building began in 2012 and was completed in 2016.

The Project

- Exterior walls.
- Toilet and Bathrooms
- Roofdeck
- Elevator Pits

Solutions

- The Zumicon team joined the contractors from the resumption of the project in the summer of 2016 and made all effort to seal all cracks and made it watertight. Brushbond TGP crystalline waterproofing was applied to exterior walls, Boscoseal PU concealed-type PU membrane to all wet areas while Hyperdesmo Liquid applied polyurethane membrane exposed – type on the roof deck.
- The client benefited from being able to contract with a single party for the various types of waterproofing demands, giving an economical solution that could be applied rapidly and to the required specification.
