

Okada Manila

Okada Manila is a hotel and casino spot ideally located close to NAIA International Airport, has now got a newly developed underground parking facility that can accommodate thousands of cars at a time. Due to it being one of the top tourist destination in Manila it was clear that was on the rise and the need of a car parking infrastructure.

The Solution

Zumicon joined other coating contractors to finish 6,000 sq.m. parking area. The Specified brand was Flowcrete Deckcoat EP epoxy anti-skid finish for the parking areas and for the ramps which would be hardwearing, abrasion resistant and aesthetically good.

Client and consultant were delighted by the quality of work and on time delivery.
